1. Applicant is given **no new time period** if the non-compliant amendment is an after-final amendment or an amendment filed after allowance. If applicant wishes to resubmit the non-compliant after-final amendment with corrections, the **entire corrected amendment** must be resubmitted.
2. Applicant is given **one month**, or thirty (30) days, whichever is longer, from the mail date of this notice to supply the correction, if the non-compliant amendment is one of the following: a preliminary amendment, a non-final amendment (including a submission for a request for continued examination (RCE) under 37 CFR 1.114), a supplemental amendment filed within a suspension period under 37 CFR 1.103(a) or (c), and an amendment filed in response to a *Quayle* action. Extensions of time are available under 37 CFR 1.136(a) only if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action.

Failure to timely respond to this notice will result in:

Abandonment of the application if the non-compliant amendment is a non-final amendment or an amendment filed in response to a *Quayle* action; or

Non-entry of the amendment if the non-compliant amendment is a preliminary amendment or supplemental amendment.

Continuation of 1(c) Other:

The amendment to the specification filed on 12/8/09 is non-compliant for the following reasons:

A Notice of Non-compliant Amendment (PTOL-324) was previously mailed on 11/23/09. This notice indicated that the amendment to the specification filed on 8/11/09 was non-compliant due to three undocumented changes to the specification (designated (1)-(3) therein). It was further noted that Applicants did not respond to several objections to the specification made in the Office Action mailed 2/17/09.

In the amendment to the specification filed on 12/8/09, Applicants include amendments that document changes (1)-(3), as well as addressing the other objections to the specification. However, rather than making the amendments to the specification as originally filed (8/11/09), the amendments have been made with respect to the non-compliant amendment filed on 8/11/09, which is not considered to have been entered in the record. For example, in the original specification, page 3, line 17 recited "SEQ ID NO: 48". In the amendment filed 8/11/09, this was changed to "SEQ ID NO: 46". However, this change was not entered due to the undocumented (non-compliant) changes to this same page. In the amendment filed 12/8/09, line 17 is shown as reciting "SEQ ID NO: 46" without the appropriate markings indicating the change from "SEQ ID NO: 48".

Applicants must amend the specification with respect to the immediate previous version of the specification, which in this case is the original specification filed on 6/1/06. Thus, Applicants should resubmit the amendment to the specification in such a form that includes documentation showing all of the changes to the specification (i.e., a single amendment showing all of the changes from both the 8/11/09 and 12/8/09 non-compliant amendments) with respect to the original specification filed on 6/1/06.
